

FitSense

PHASE 01 OF 08 | BRAINSTORMING & IDEATION

Project overview

FitSense is described as a modular REST API for recording workouts and helping users understand progress. The brief covers authenticated personal records, workout search and management, fitness statistics, and Gemini-based recommendations informed by user goals and experience.

Project description

A fitness-tracking API for secure workout records, searchable history, performance insights, and personalized recommendations.

Project status

Not stated in the source brief. Update this document when the team records an agreed status.

Project capabilities

- Secure workout history
- Workout search and management
- Fitness statistics
- Goal-aware AI recommendations

Phase description

Define the user problem, explore ideas, and agree which opportunity is worth solving.

Project-specific phase focus

Understand how people currently record workouts and where progress tracking breaks down.

Phase status and progress

Status: Not stated in the source material.

Progress: Not recorded in the source material.

Tasks and requirements

- ☐ List and group solution ideas
- ☐ Prioritize ideas by feasibility and importance
- ☐ Write the customer problem statement
- ☐ Map what the user says, thinks, does, and feels
